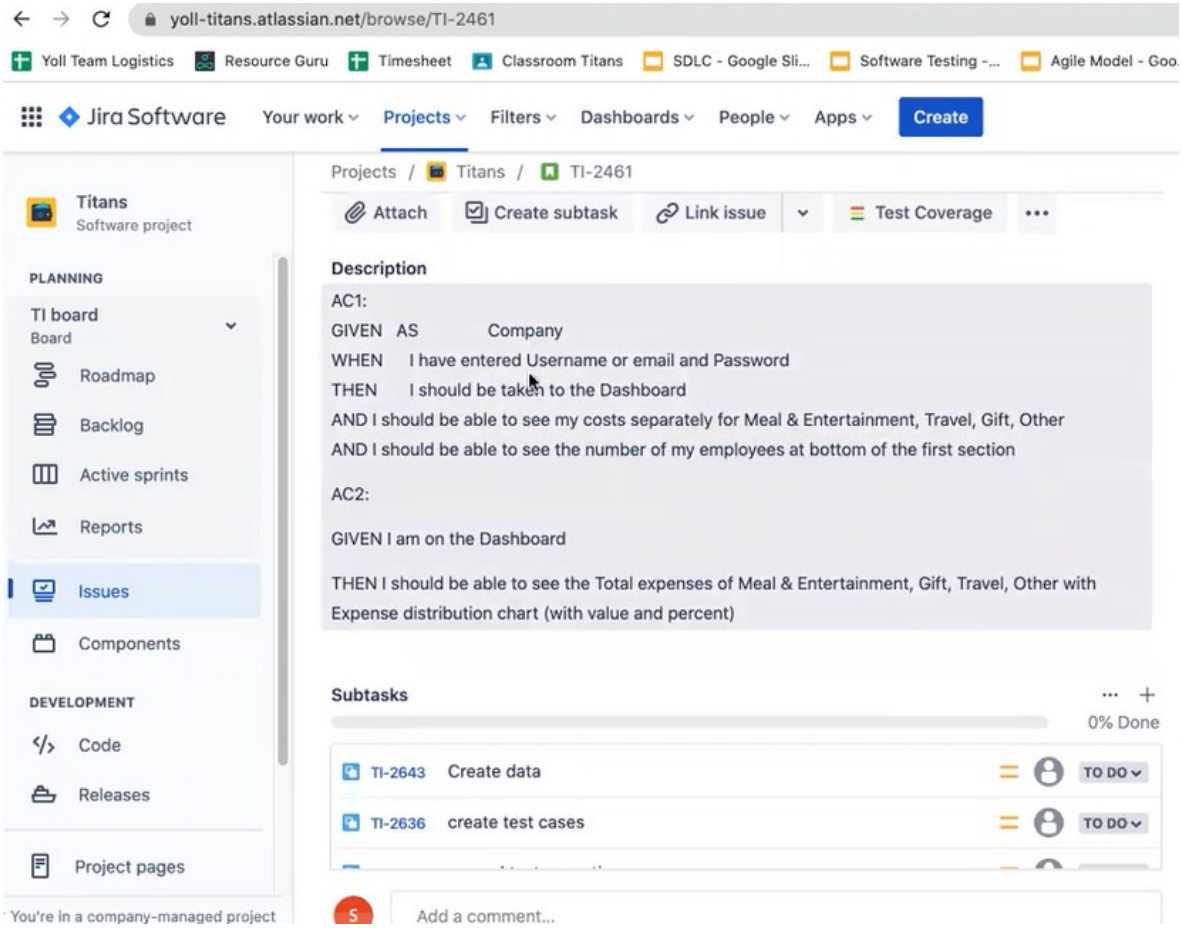
# Test Case Execution

➢ process of executing the code and comparing the **expected** and **actual results**.

**Test Case Execution is the process of running test cases to validate whether the software meets the expected behavior by comparing the expected results against the actual results.**

# Task : How to create a Test Execution ?

Go to : User Story Number : TI-2461



We need to add the Test Cases to the Test Execution

Click Create Button

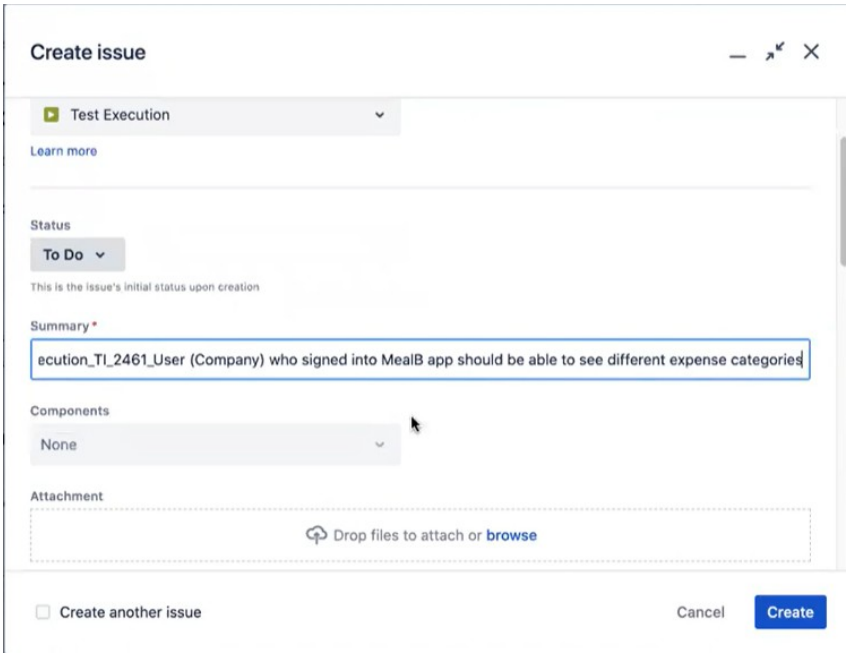
It does not need a description

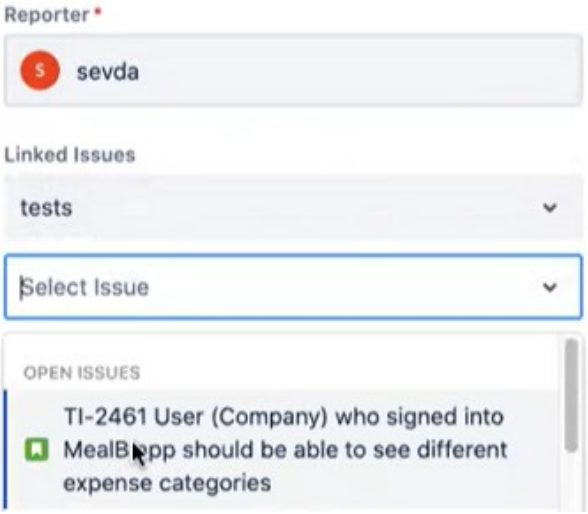
Link the User Story Number to the Test Execution

Copy the Summary from the User Story, and Paste it on the summary of the Test Execution

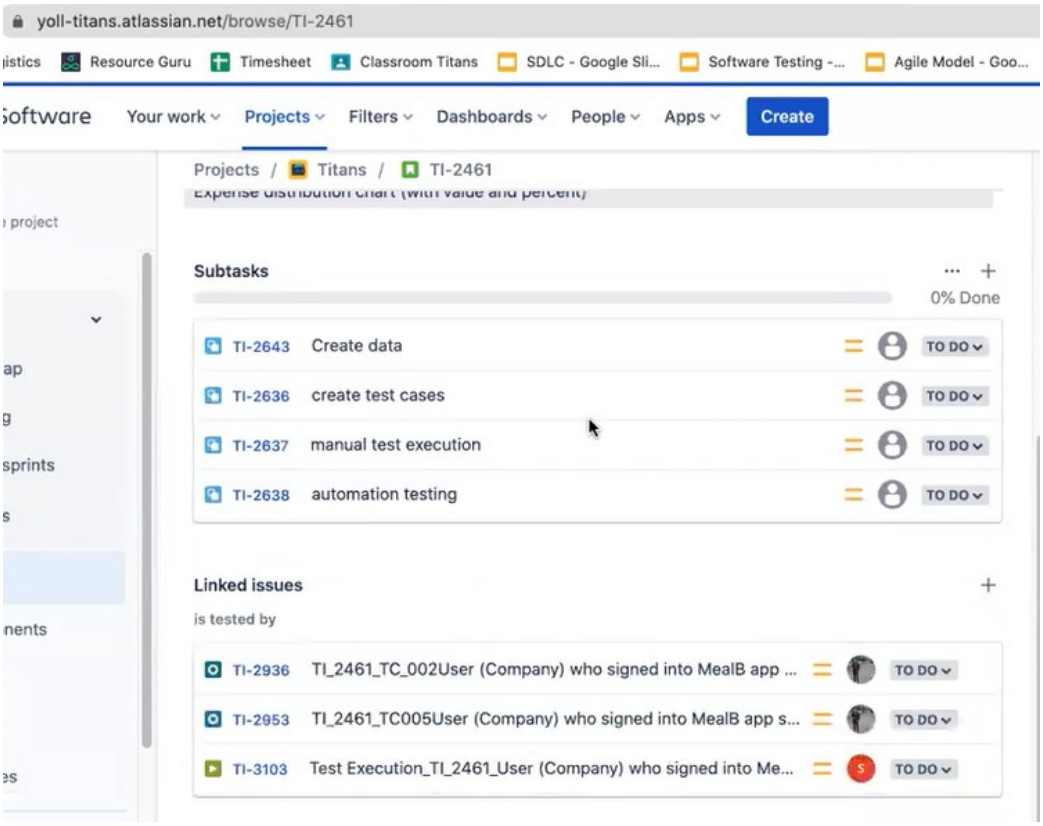
Assign to yourself

Refresh the page



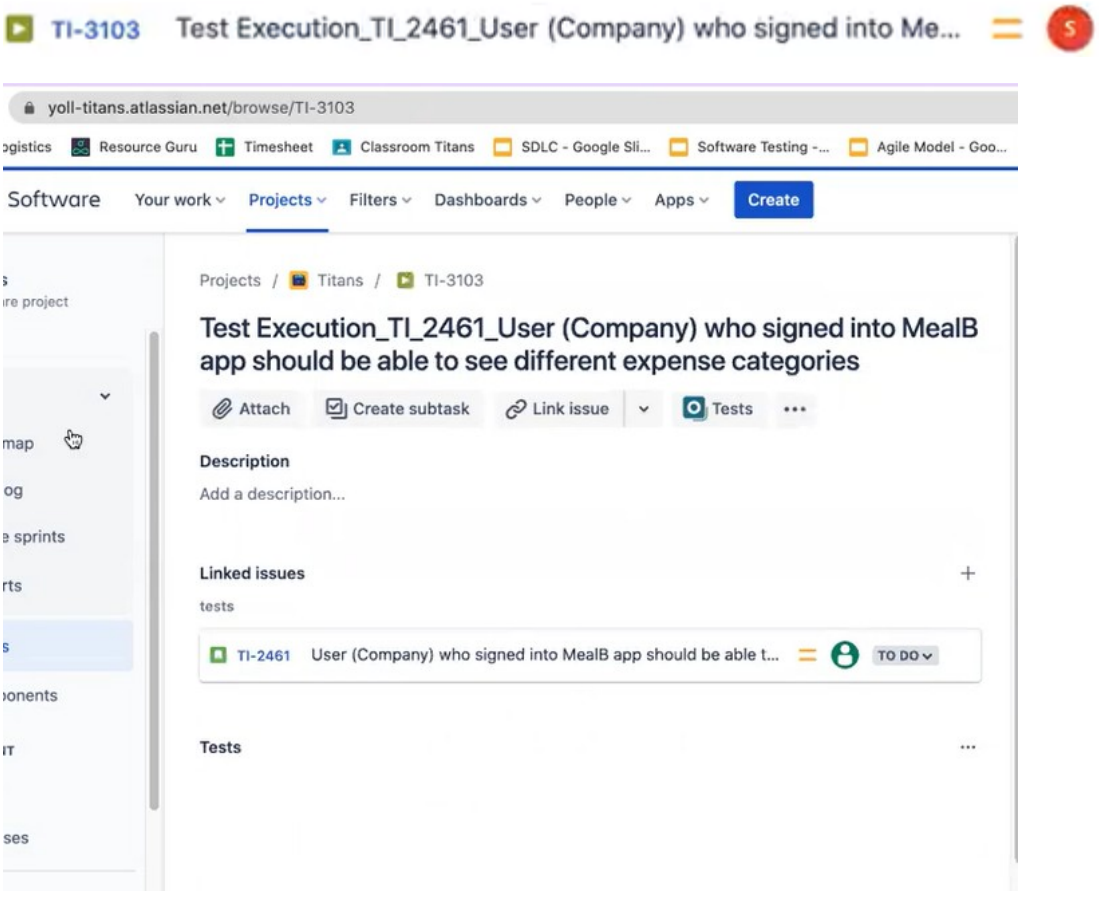


After Refresh:



Adding the TWO Test Cases (TI-2953 and TI-2936) to the Test Execution (TI-3103):

Click on the link:



Scroll Down:

Click on Add tests / Existing Tests

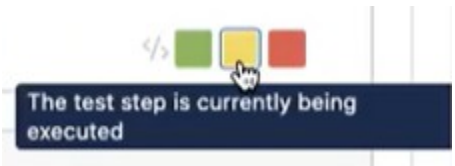
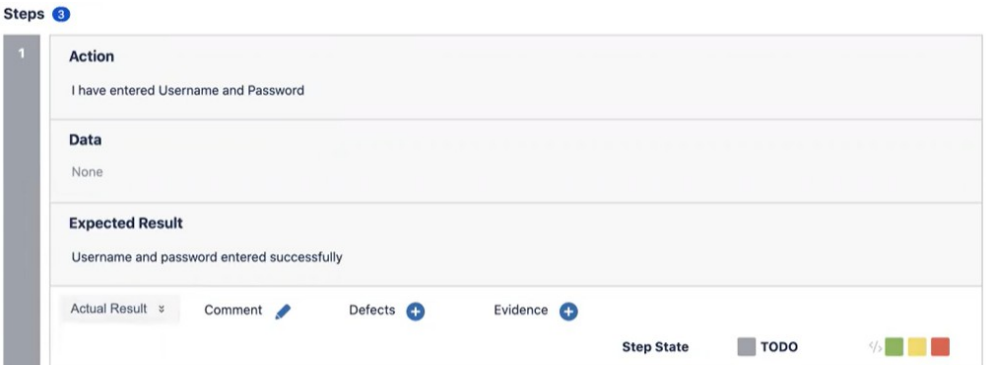
## Meaning of Green, Yellow, and Red Colors:

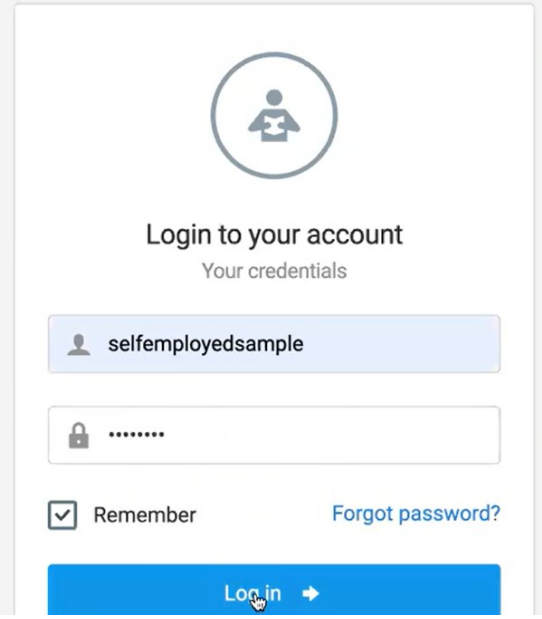


# How to do Manual Testing by creating Test Execution:

## First Step

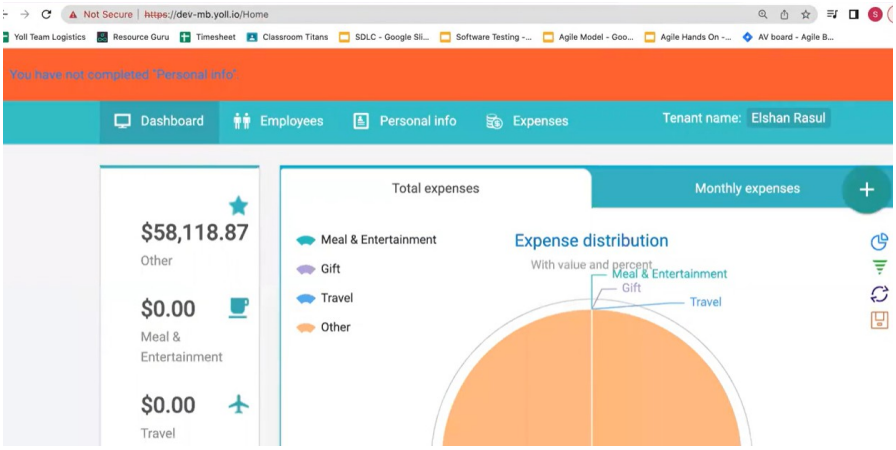


## I login to MealB, and click on Login Button:



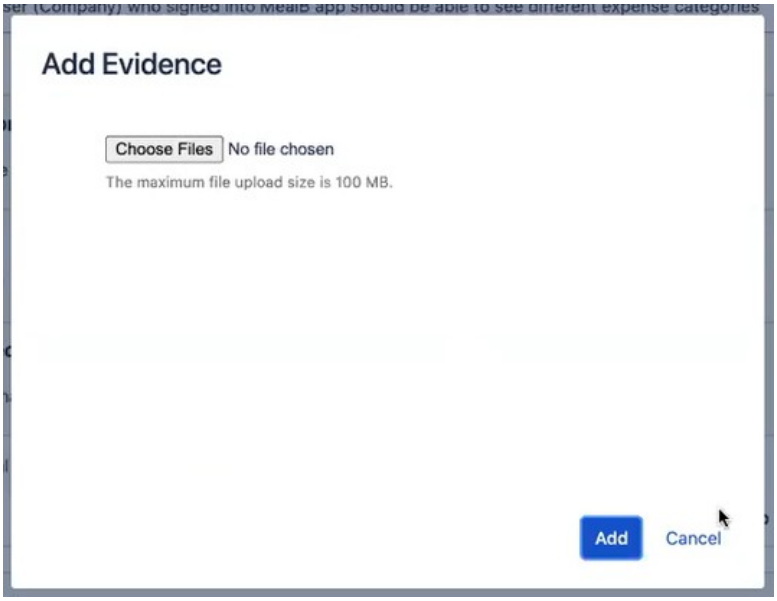
**I see that I enterd successfully.**

**And I landed to the Dashboard.**



**I click on the Green button that means the TEST PASSED SUCCESSFULLY**

**Then Click on EVIDENCE to ADD a SCREENSHOT Etheir it has passed or failed.**



**If it is failed we create a bug by clicking on Defects**

**Or by clicking on the button Create**

## Second Step
